DETAILED ACTION

Specification

1. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3728

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 14, the phrase ""said device a cover covering" is vague and indefinite. It is not clear what structure such language encompasses.

Claim 14 recites the limitation "said sole" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 14-22, 25-26 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Ellis (3,206,874). Ellis '874 discloses an assembly comprising: a shoe and a device (foot protector 34 with guard flap 36) for flexural stiffening and/or protection of the shoe; said shoe having a flexion fold zone, an upper front surface, a front end zone, said device covering said upper front surface of said shoe and extending from said flexion fold zone of said shoe to said front end zone of said shoe.

With respect to claims 16, 17 and 20-22, note the journal connection/insert (hinge 40 and plate 38) in Figures 1 and 2 embodiments.

With regard to claim 25 and the material of the cover, see column 3, lines 2-6.

Art Unit: 3728

With regard to claim 26 and the immobilizing means, note the rivet (45) in Figures 1 and 2 embodiments.

6. Claims 14-22, 25-26 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by O'Donnell 93,068,593). O'Donnell `593 discloses an assembly comprising: a shoe and a device (foot protector flap 32) for flexural stiffening and/or protection of the shoe; said shoe having a flexion fold zone, an upper front surface, a front end zone, said device covering said upper front surface of said shoe and extending from said flexion fold zone of said shoe to said front end zone of said shoe.

With respect to claims 16, 17 and 20-22, note the journal connection/insert (furrules 31 and studs 36) in Figures 1-4 embodiments.

With regard to claim 25 and the material of the cover, see column 2, lines 27-29.

With regard to claim 26 and the immobilizing means, note the screw (41) in Figures 1-4 embodiments.

7. Claims 14, 15, 19, 26 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by ETABLISSEMENTS JACQUES LANDRY (FR 2 361 837) discloses an assembly comprising: a shoe and a device (2) for flexural stiffening and/or protection of the shoe; said shoe having a flexion fold zone, an upper front surface, a front end zone, said device covering said upper front surface of said shoe and extending from said flexion fold zone of said shoe to said front end zone of said shoe.

With respect to claim 19, the device extends from a tibia support zone to the zone of the base of the toes. See the Figure.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis `874. Ellis `874 discloses that the cover can be made of different materials which inherently will have different rigidity. (see column 3, lines 2-6). Therefor, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a plurality of covers made from different materials having varying rigidities, since it has been held that mere duplication and rearranging of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. V. Bemis Co.*, 193 USPQ 8 and *In re Einstein*, 8 USPQ 167.

Allowable Subject Matter

10. Claims 23 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are protector devices analogous to applicant's instant invention.
